

As the Senior Director for Cancer Research Administration of the Winship Cancer Institute, my goal is to provide the necessary infrastructure and support for Winship members to conduct transformative cancer research in a collaborative and engaging environment. In this role my responsibilities include: a) overall administration of the CCSG, b) development of all CCSG related budgets, c) development of the shared resource operational budgets and their financial oversight, d) oversight and management of the Winship Pilot Grant Initiative (CCSG and philanthropic funds), e) operational oversight of the Winship shared resources, f) coordination of shared resource initiatives at the university level and, g) all CCSG reporting. With 13 years of experience in biomedical research and over 10 years of research administration experience in addition to active participation in the Cancer Center Administrator Forum and two NCI-designated External Scientific Advisory Boards, and three EABs for developing centers, I bring a unique approach to the administration of NCI-designated cancer centers. I am committed to serving as a critical member of the Winship senior leadership team to support the mission of the cancer center and ultimately the translation of research into clinical practice
