

Ken Schoppmann, CAE, IOM

Executive Director of Association of Biomolecular Resource Facilities

For more than 25 years, Ken Schoppmann created the means to advance the mission of diverse nonprofit organizations, including trade and professional associations. He is currently the Executive Director for the Association of Biomolecular Resource Facilities, an international professional membership society representing professionals working in shared research facilities around the world.

Ken has led numerous organizations through various stages of development, expanding and enhancing internal capacity and improving their value to stakeholders. As a servant leader, he is motivated to help groups achieve more together than they can by themselves. Ken has worked in all areas of association management, including finance, administration, event management, membership, board development, and strategic planning. He has successfully collaborated with volunteer leaders to evaluate and elevate their programs, increasing member recruitment and retention. Ken partners with subject matter experts from diverse fields to develop new content and create new ways to meet evolving members' needs.

Ken also serves as a pro bono consultant for local nonprofit groups, leading teams to help mission-driven organizations enhance their capacity, including strategic planning, fundraising, and board development.

Ken is a Certified Association Executive and holds an Institute of Organizational Management certificate from the U.S. Chamber of Commerce. He completed his Masters in Organization Management at George Washington University and his undergraduate work in Economics at Georgetown University.
