

Teng-Leong Chew is the inaugural director of the Advanced Imaging Center and the Integrative Imaging Program at HHMI Janelia Research Campus. His main research interest is in the spatiotemporal regulation of the cytoskeleton and biomechanical force generation. Leading the scientific advisory boards of EuroBioimaging, Global Bioimaging, France Bioimaging, African Bioimaging Consortium, as well as many other international microscopy organizations, Dr. Chew is especially keen on the development of global strategy for microscopy dissemination and training. He has formulated and championed the launch of the Imaging Africa, Africa Microscopy Initiative, Imaging Latin America, and Microscopy in Southeast Asia

Keynote Session 1, Thursday June 13th, Parthenon A/B,
