

Alvaro N.A. Monteiro, PhD

Dr. Monteiro is a Senior Member in the Population Sciences Division at the Moffitt Cancer Center and a Professor in the Department of Oncologic Sciences at the USF College of Medicine. He is the Scientific Director of the Molecular Genomics Shared Facility and directs the Laboratory of Cancer Genetics & Genomics. The main theme of his laboratory is the integration of systems biology, genetics, and molecular biology to explore the role of genetic variation in cancer predisposition, development, and treatment.
